Actuator 01VS61

01VS61 is a quiet and powerful actuator up to 6000N thrust, designed for furniture, home care and fitness equipment. The design of slider-type linear motion achieves a larger stroke with a smaller installation size, making 01VS61 one of the ideal driving solutions for electric recliner.

Remarks:

* The self-locking ability is performed by short circuit the motor terminals when the actuator is powered off. All compatible control boxes are designed with this feature. Mechanical brake in push direction is available upon request, to further enhance the self-locking ability to maximum load.

** The typical speed or typical current means the average value neither upper limit nor lower limit, which measured under room temperature and stable power. The performance curves are made with typical values.
